JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS
VOLUME 50, 20 MAY 1994

Proceedings of the Fifth International
Congress on Computational
and Applied Mathematics
July 27–August 1, 1992, Leuven, Belgium

CONTENTS

Editorial 1

Preface 5

INVITED PAPERS

G. Monegato
Numerical evaluation of hypersingular integrals 9

N. Papamichael and N.S. Stylianopoulos
On the theory and application of a domain decomposition method for computing conformal modules 33

M. Vanmaele and A. Ženíšek
External finite-element approximations of eigenfunctions in the case of multiple eigenvalues 51

R. Verfürth
A posteriori error estimation and adaptive mesh-refinement techniques 67

CONTRIBUTED PAPERS

M.B. Abd-el-Malek
Flow in a waterfall with large Froude number 87

L. Atanassova
On the simultaneous determination of the zeros of an analytic function inside a simple smooth closed contour in the complex plane 99

Th. Beck
Automatic differentiation of iterative processes 109

Th. Beck and H. Fischer
The if-problem in automatic differentiation 119

M. Bernadou
$\mathscr{C}^1$-curved finite elements and applications to plate and shell problems 133

P. Bocher, H. De Meyer and G. Vanden Berghe
On Gregory- and modified Gregory-type corrections to Newton–Cotes quadrature 145

A. Bultheel, E. Hendriksen, P. González-Vera and O. Njåstad
Quadrature formulas on the unit circle based on rational functions 159

R. Cariño, I. Robinson and E. De Doncker
Adaptive cubature over a collection of triangles using the *d*-transformation 171

G. Criscuolo
Lagrange interpolation with constraints 185

J.S. Dehesa, A. Zarzo, R.J. Yañez, B. Germano and P.E. Ricci
Orthogonal polynomials and differential equations in neutron-transport and radiative-transfer theories 197

T. Dehn
A shortcut to asymptotics for orthogonal polynomials 207

T.J. Dekker, W. Hoffmann and K. Potma
Parallel algorithms for solving large linear systems 221

B. Della Vecchia, G. Mastroianni and P. Vértesi
Simultaneous approximation by Hermite interpolation of higher order 233

E. Dick and K. Riemslagh
Multi-staging of Jacobi relaxation to improve smoothing properties of multigrid methods for steady Euler equations 241

V. Druskin and L. Knizhnerman
On application of the Lanczos method to solution of some partial differential equations 255

U. Ehrenmark
On computing uniformly valid approximations for viscous waves on a plane beach 263

S.W. Ellacott
Techniques for the mathematical analysis of neural networks 283

R. Fazio
Numerical transformation methods: a constructive approach 299

J.A. Ford and I.A. Moghrabi
Multi-step quasi-Newton methods for optimization 305

P. González-Vera and R. Orive
Optimization of two-point Padé-type approximants 325

W. Govaerts
Solution of bordered singular systems in numerical continuation and bifurcation 339

P. Köhler
Intermediate error estimates 349

W.B. Krätzig and J.-W. Zhang
A simple four-node quadrilateral finite element for plates 361

L.J. Lardy
The projection Kantorovich method for eigenvalue problems 375

P.M. Lima
Richardson extrapolation in boundary value problems for differential equations with nonregular right-hand side 385

M.T. Nakao and Y. Watanabe
On computational proofs of the existence of solutions to nonlinear parabolic problems 401

J. Nedoma
Finite-element analysis of contact problems in thermoelasticity. The semi-coercive case 411

E. Noldus and M. Loccufier
An application of Liapunov's method for the analysis of neural networks 425

L. Paquet
Precise evaluation of a polynomial at a point given in staggered correction format 433

J.D. Pryce
Classical and vector Sturm–Liouville problems: recent advances in singular-point analysis and shooting-type algorithms 455

K. Ruotsalainen
On the convergence of the collocation method for nonlinear boundary integral equations 471

J. Saranen and L. Schroderus
The modified quadrature method for classical pseudodifferential equations of negative order on smooth closed curves 485

T. Scapolla
A third-order mixed finite-element method for the numerical solution of the biharmonic problem 497

H. Schwandt
An interval arithmetic domain decomposition method for a class of elliptic PDEs on nonrectangular domains 509

B. Simeon, F. Grupp, C. Führer and P. Rentrop
A nonlinear truck model and its treatment as a multibody system 523

B.J. Stoyanov, R.A. Farrell and J.F. Bird
Asymptotic expansions of integrals of two Bessel functions via the generalized hypergeometric and Meijer functions 533

M. Van Barel and A. Bultheel
Discrete linearized least-squares rational approximation on the unit circle 545

C.A.M. Van Berkel and S.J.L. Van Eijndhoven
Convolution integral equations with Gegenbauer function kernel 565

J. Verschelde and R. Cools
Symmetric homotopy construction 575

J. Wang
New convergence estimates for multilevel algorithms for finite-element approximations 593

M.A. Wolfe
An interval algorithm for constrained global optimization 605

A. Zarzo and J.S. Dehesa
Spectral properties of solutions of hypergeometric-type differential equations 613
